Giving physicians what they need

We prioritize your patient's health and comfort above all else.

We're not just here for you. We're here because of you.

HCA was founded by physicians. Their purpose was to create an environment where healthcare can flourish. They believed the best patient care begins with giving physicians what they need.

Today, over 215,000 healthcare professionals, including over 37,000 active physicians, choose to treat their patients at an HCA facility. Our national network includes over 180 hospitals, 116 freestanding surgery centers, and over 600 urgent care facilities.

Healthcare with integrity

Our physicians benefit from our dedication to providing:

More value to our physicians, saving for input on our operations and offering leadership opportunities.

More growth through learning, administrative support, and extended work to more patients.

More time to give better care with access to specialty operating facilities and a network of trained peer expertise and clinical knowledge.
